

Zaizi is looking for Test Engineering Apprentices. Successful applicants will have a chance to learn cutting-edge delivery technologies on some of the most interesting digital projects in government.

As a consultancy with a broad range of government clients, we're looking for the next wave of trainees to take our Test Engineering practice to the next level. You'll spend an initial phase with Makers, learning foundational skills, before placing with one of our project teams to learn your craft in action.

About You

- Passionate about learning new technologies.
- Great communication skills.
- Curiosity and a desire to get things done.

About Us

- A culture of openness, honesty, fairness and enthusiasm
- Cutting edge projects in the public sector
- A close knit community of passionate and experienced people
- A supportive environment in which you can explore new opportunities and develop new skills
- Certifications and accreditations available for different technologies such as Cypress and ISTQB

You'll Learn

- Basics of software testing
- Cypress
- Nightwatch
- Version control with Git
- Performance testing with JMeter
- JIRA and Confluence
- Agile Delivery & Scrum

Security Clearance

Please note you will need to comply with Baseline Personnel Security Standard (BPSS) to be offered this role. In addition, as you will be dealing with SC and DV cleared personnel files, you may be sponsored for Security Clearance (SC). As such applicants MUST have the legal right to work in the UK and have lived in the UK continuously for the last five years.
