Junior Software Engineer Apprenticeships available at Compare the Market: Peterborough and London locations

Salary offered: £30,000 + 2k London weighting

Start date: September 2022 admissions
Number of Apprenticeships available: 3

Here at Compare the Market we're investing in the growth of our own talent through our new apprenticeships for 22/23.

We have a number of amazing apprenticeship opportunities starting in September 2022 across Software Engineering which will help launch your career in this area.
Do you consider yourself to be creative, do you enjoy problem solving, are you an active learner? If yes, then this could be the programme for you.

You'll work in an agile team creating innovative solutions, whilst having access to a wide range of technologies to create our great propositions that our customers know and love. We're invested in your success and will support and encourage your professional and personal career development.

At CtM we care about our people, you are the core to our success, we are invested in your personal development and have opportunities for you to learn from experienced professionals as well as a brilliant Learning and Development offering. CtM is the place of opportunity!

During our training programme, there is a strong focus on self-learning and development, you'll spend your first week understanding our innovative culture at one of the comparethemarket.com's offices in either Peterborough or London, before spending the next 12 weeks studying at the Makers Academy, a leading web developer online boot camp. Training hours will be from 9.30am to 6pm. This will kick start your coding journey on a Level 4 Software Developer Standard Apprenticeship.

Following on from boot camp, you'll join one of our tech teams, where you will develop your career towards either a Software Engineer or Test Engineer, delivering real business projects that add value to our customers.

What will you be responsible for as a Junior Software Engineer?

- Developing first class software engineering solutions
- Work alongside team members to deliver features and add value to your team
- Solving complex problems
- Champion simplicity
- Understanding how our customers interact with our products
- Working with agile methodologies and lean thinking methods

- Presenting your findings and making recommendations to improve business performance
- Contributing to the team by sharing knowledge, ideas, and findings

What will it take to be successful as a Junior Software Engineer?

- Maths and English Language Grades A*-C (or equivalent) - Essential
- You cannot hold a similar qualification at the same level or higher (Level 4/Degree) within the same sector
- You'll be an active learner, both within your technical and professional areas of expertise, taking control of your own career development
- You'll have a passion for technology, with some exposure to modern programming language (e.g. .Net, C#, React, SQL, .Node)
- You'll be naturally inquisitive
- You will have excellent communication skills with the drive to contribute to a team
- You're highly logical with creative problem-solving skills

Why choose us?

You might already know us - we're the ones with the Meerkats! ComparetheMarket has helped revolutionise the insurance market and we have been growing rapidly since starting in 2006. We are on a mission to transform the comparison industry, moving beyond endless forms and generic search results, to a highly personalised, service-led experience. In order to do so, we recognise that we need to consistently deliver seamless, personalised customer experiences through a connected data and technology ecosystem.

Our Vision - Be the market leader in money management – transforming the way the people of the UK manage their household bills, helping everyone have a healthier relationship with their money.

Our Purpose - Making great financial decision-making a breeze for everyone

Our Promise - Good things happen when you meerkat!

Diversity and Inclusion We're a diverse community of dedicated, innovative, and talented professionals. With an inclusive and open workplace, we encourage our people to create and share ideas – supporting their growth and celebrating their uniqueness.

Flexible working We understand the importance of achieving a healthy lifestyle balance, whether it's working remotely or flexibly, we have an environment where people are empowered to embrace flexible working in a way that works for them and for the business
