The Opportunity

We are growing our team at Deloitte to enable us to build more great enterprise solutions for our clients. Impact and value drive everything we do. We work at the highest level, with senior leaders to create solutions that deliver the absolute maximum return on investment, across the backbone of their organisations. We transform the digital enterprise with innovative and core technologies, delivering tangible, sustainable benefits.

We have been doing this for a while now and have gotten pretty good at it. However, we are always looking for better and more fun ways to do things. Here are just some of the tools and techniques we are using at the moment:

- Kanban and data-driven estimations
- Behaviour Driven Development (BDD)
- Strong Continuous Integration / Continuous Deployment (CI/CD) principles
- Regular team retrospectives
- Rapid prototyping tools

We bring the best-in-class enterprise solutions to meet our client's needs, across all industries. The initial focus will be working with some of the biggest names in the technology space, including SAP, Oracle, Salesforce and Workday.

Responsibilities

You will be part of a diverse team that challenges itself to provide simple solutions to complex problems. You will be responsible for developing innovative solutions that are at the heart of our client's business needs. You will have the chance to work with some of the best Developers, UX Designers and Strategy thinkers in the business, delivering solutions for some of the biggest and best companies in the world. For us, developers are not people who are locked in a room to churn out code to match a large paper based specification. They need to work alongside our clients and combine deep technical expertise with innovative thinking and problem solving.

Working in one of our mature delivery teams, you will be part of the entire delivery process, from impact assessing new work right the way through analysis, development, test, and deployment to production. A career in Deloitte will take you on a challenging and rewarding journey. You will have opportunities to learn new skills and techniques and learn about what it takes to successfully develop and run new services. We pride ourselves on our quality and speed of delivery and you will get to work with and learn some of latest technologies, tools and techniques that allow us to continually outclass our competition.

Your career in Deloitte will take you on a journey to support many large FTSE100 firms achieve their most critical strategic objectives by:

- Delivering Technology and Business led transformations across broad spectrum of industries such as Retail, Technology, Media & Telecoms, Aerospace & Defence, Education and Healthcare.
- Designing and developing enterprise applications to deliver next level sustainable customer experience and to become a data driven digital enterprises
- Collaborating with multidisciplinary, diverse and passionate teams whose disruptive thinking delivers better solutions, faster results.
- Building meaningful relationships that enable transparent and agile ways of working

Requirements

- Drive and determination to continually learn new things and develop yourself into a world class digital developer
- Passion for digital and new technology
- A team player who enjoys working with others to solve problems and sharing knowledge
- Strong written and oral communication skills
- A balance of logical problem solving and innovative thinking

Diversity, Respect, and Inclusion are at the heart of Deloitte - and we believe that everyone can thrive, develop, and succeed in our firm based on their talents.

We therefore look forward to welcoming individuals from any and all backgrounds who enjoy working collaboratively and are enthusiastic problem solvers.
